

# Environmental Restoration Across the Globe

Testing innovative approaches  
in Europe, USA and Canada

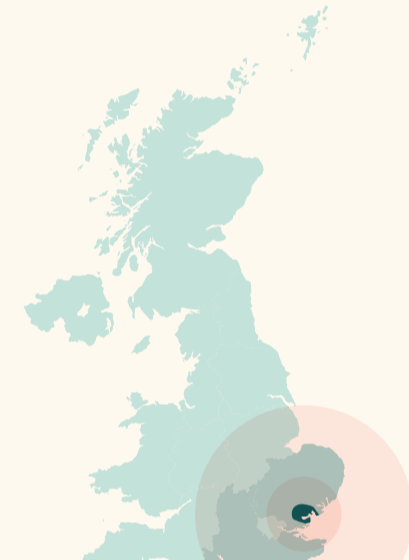

**Our Demonstration Sites, featuring coastal lagoons and mudflats, highlight diverse climates and restoration stages. Chosen for their significance and varied conditions, they serve as living labs for rewilding and climate resilience techniques.**

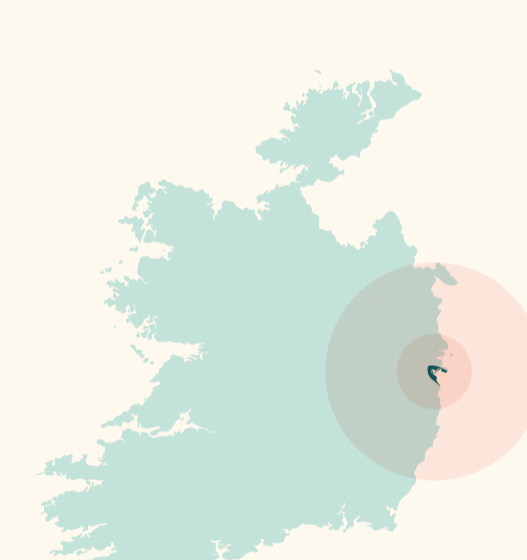

DANMARK

# Rewilding European Shorelines and Beyond

Developing Innovative  
Conservation Approaches to  
Restore Europe's Intertidal Areas

## Multi-Actor Labs

Connecting climate, nature and people  
to assess drivers and barriers to rewilding.

## System Thinking

Adopting a system thinking approach to predict  
the future of coastal areas across Europe.

## Tools and Methods

Developing tools and methods for successful rewilding.

## Global Approach

Exploring saltmarsh, seagrass meadows  
and mudflats across demo sites in  
Europe, USA and Canada.
